DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Ute Mountain Tribal "E" No. 2. On August 31, 1958, 5-1/2" casing was set at 4020' and cemented in two stages. Ran MWD formation pack off shoe on bottom with DV tool located at 3677'. First stage cemented with 50 sacks 45 gal cement. Opened ports on DV tool with 700 pounds. Circulated while waiting on cement for five hours. No cement returns. Cemented second stage from 3677' with 350 sacks 45 gal cement. Had good circulation throughout first and second stages. Top cement second stage 2430'. After waiting on cement, casing and water shut off were tested with 2900 pounds pressure for 15 minutes, which held with no drop in pressure.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
