Well No. 29 is located 1724 ft. from N line and 2067 ft. from W line of sec. 31

SE 1/4 Sec. 31 31N 16W NMPM  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
Horseshoe Gallup San Juan New Mexico  
(Field) (County or Subdivision) (State or Territory)

Ground

The elevation of the ~~derrick floor~~ above sea level is 5554 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well is perforated 1297'-1306' and 1233'-1252' in the Gallup Formation. We propose to convert the well to water injection for secondary recovery. A packer will be used to separate the zones. Water will be injected through tubing into the lower zone and through the casing-tubing annulus into the upper zone.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
