DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to move in rotary tools, clean out well by drilling and blowing with gas. Plug back to base of first Dakota with bridge plug and cement, fracture formation with Welox fracturing tool and sand-oil fracture first Dakota for increase of gas production from this formation.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
