The Mountain Shoshone
Well No. 22 is located 600 ft. from S line and 600 ft. from E line of sec. 29
SW 1/4 of SW 1/4 of Sec. 29 31 15W R24N
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Yards Gulch San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 5600 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Tennessee Gas Transmission Company plans to permanently abandon the well with the casing left in the hole. Well was completed in October 1957, with 250' of 2 7/8" OD, 11.2 lb, 3-25 casing and cemented with 150 ms. of cement. We plan to abandon the well as follows: Square perforations from 250' to 260' with 20 sacks of cement. Spot 3 sacks of cement in 2-7/8" OD casing at surface. Spot 10 sacks of cement in annular space between 2-5/8" OD surface casing and 2-7/8" OD casing at surface. Break permanent marker and clean up location.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
