Ute Mountain Tribal "B"

Farmington, New Mexico January 30, 1959

Well No. 4 is located 970 ft. from 1/4 line and 1850 ft. from W line of sec. 26

SW/4 of Section 26 T21N R15W E.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Verde-Colina San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 5472 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Ute Mountain Tribal "B" Well No. 4. On January 25, 1959, 5-1/2" casing was set at 1000' with two-stage tool at 3920'. First stage was cemented with 75 sacks 65 gel cement with 2 pounds tuf plug per sack. Casing was tested with 3000 pounds pressure for 15 minutes, which held with no drop in pressure. Opened ports and circulated for 4 hours. Circulated out 20 barrels cement mud. Second stage was cemented with 350 sacks 65 gel cement with 2 pounds Tuf Plug per sack. Top cement by temperature survey 1590'. Drilled out 2-stage tool and displaced mud with oil. Released rig on January 26, 1959. Moved in completion unit on January 28, 1959 and tested casing with 3000 pounds pressure which held with no drop in pressure.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
