Well No. 4 is located 990 ft. from S line and 1090 ft. from W line of sec. 26  
SW/4 of Section 26 T-31-N R-15-W N.M.P.M.  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
Yards Gulch San Juan New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 5461 ft. (OL)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

The following completion work has been performed on the Ute Mountain Tribal "F" No. 4, which is currently recovering lead oil used during completion operations at a very low rate.

The main Gulch pay was perforated with two shots per foot 3866-3931 and sand oil fractured with 41,100 gallons oil and 60,000 pounds sand, spearheaded by 200 gallons acid. As recovery of lead oil had declined to 5 barrels of oil per day, the zone was re-stimulated with a treatment of 75,000 gallons oil and 75,000 pounds sand. Lead oil recovery rate has declined to 6 barrels oil per day with 42 barrels of lead oil to recover.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations are commenced.
