DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

Rotary drilling equipment will be used to drill to approximately 400' to the formation. If production is found, casing will be set and cemented with standard cement of strength. Before and after casing will be drilled. There will be tested and electric logs will be run prior to setting casing or abandonment. Stimulation treatments may be employed in completion.
