ed rods and tubing an moth balls and frace balls followed by 75	ective sands; show sizes, weights, and length ing points, and all other important proposed sand pumped inside limit w/12,500f of 20—40 sand pumped 20—40 san	er to T.D. 3855'. Pumped in
ed rods and tubing an moth balls and frace balls followed by 75	ective sands; show sizes, weights, and length ing points, and all other important proposed.	M. Pumped in another 500#
ed rods and tubing an moth balls and frace balls followed by 75	ective sands; show sizes, weights, and length ing points, and all other important proposed sand pumped inside limit w/12,500f of 20—40 sand pumped 20—40 san	er to T.D. 3855'. Pumped in
ed rods and tubing an moth balls and frace balls followed by 75	ective sands; show sizes, weights, and length ing points, and all other important proposed sand pumped inside limit w/12,500f of 20—40 sand pumped 20—40 san	er to T.D. 3855'. Pumped in
ed rods and tubing an moth balls and frace balls followed by 75	ective sands; show sizes, weights, and length ing points, and all other important proposed sand pumped inside limit w/12,500f of 20—40 sand pumped 20—40 san	or to T.D. 3855'. Pumped in in. Pumped in another 500/ reemed out. Sand pumped in-id well on production.
ed rods and tubing an moth balls and frace balls followed by 75	ective sands; show sizes, weights, and length ing points, and all other important proposed sand pumped inside limit w/12,500f of 20—40 sand pumped 20—40 san	or to T.D. 3855'. Pumped in in. Pumped in another 500/ reemed out. Sand pumped in-id well on production.
ed rods and tubing an moth balls and frace balls followed by 75 liner to T.D. and re	ective sands; show sizes, weights, and length ing points, and all other important proposed sand pumped incide limited w/12,500% of 20—40 sand cold 20-40 sand son rods and tubing. Place	r to T.D. 3855'. Pumped in M. Pumped in another 5006' reened out. Sand pumped industrion. FEB 2 1962 OIL CON 2
ed rods and tubing an moth balls and frace balls followed by 75 liner to T.D. and re	ective sands; show sizes, weights, and length ing points, and all other important proposed sand pumped incide limited w/12,500% of 20—40 sand cold 20-40 sand son rods and tubing. Place	r to T.D. 3855'. Pumped in M. Pumped in another 5006' reened out. Sand pumped industrion. FEB 2 1962 OIL CON 2
ed rods and tubing an moth balls and frace balls followed by 75 liner to T.D. and residerstand that this plan of work must	ective sands; show sizes, weights, and length ing points, and all other important proposed sand pumped inside limit w/12,500f of 20—40 sand pumped 20—40 san	r to T.D. 3855'. Pumped in M. Pumped in another 5006' reened out. Sand pumped industrion. FEB 2 1962 OIL CON 2
ed rods and tubing an moth balls and frace balls followed by 75 liner to T.D. and remarkable before the transfer of the plan of work must pany DELHI-TAI	sective sands; show sizes, weights, and length ing points, and all other important proposed and pumped inside limited and pumped inside limited w/12,500% of 20—40 sand color 20-40 sand son a rods and tubing. Place treceive approval in writing by the Geological CLCR CIL CORPORATION	r to T.D. 3855'. Pumped in M. Pumped in another 5006' reened out. Sand pumped industrion. FEB 2 1962 OIL CON 2
ed rods and tubing an moth balls and frace balls followed by 75 liner to T.D. and remarks	sective sands; show sizes, weights, and length ing points, and all other important proposed and pumped inside limited and pumped inside limited w/12,500% of 20—40 sand color 20-40 sand son a rods and tubing. Place treceive approval in writing by the Geological CLCR CIL CORPORATION	r to T.D. 3855'. Pumped in in. Id. Pumped in another 500/ reemed out. Sand pumped in- id well on production. FEB 2 1962 Oil CON. COM al Survey before operations may be combinenced.
ed rods and tubing an moth balls and frace balls followed by 75 liner to T.D. and remainderstand that this plan of work must pany	sective sands; show sizes, weights, and length ing points, and all other important proposed and pumped incide limited w/12,500% of 20—40 sand son rods and tubing. Place it receive approval in writing by the Geologic CLOR OIL CORPORATION	FEB 2 1962 Oil COM COM all Survey before operations may be combined by Original signed by
