March 12, 1963

Mr. Lonnie Kramer
Box 1064
Farmington, New Mexico

Dear Mr. Kramer:

We are returning a packer leakage test which you have submitted on Adobe Oil Company #1 Nickles, for the reason that you have only shown one shut-in pressure on the first flow test. You indicate that this pressure was taken at the end of 46 days.

I believe that the test would be acceptable if you have some earlier pressure to indicate what the Mesaverde pressure was prior to the time the Dakota was opened.

Yours very truly

Emery C. Arnold
Supervisor, District #3
