San Juan

(County or Subdivision)

New Mexico

(State or Territory)

The elevation of the derrick floor above sea level is 5720 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Propose to: Pull tubing and rods. Set bridge plug at 1760'. Test for cement behind 5 1/2" casing - if no cement behind casing - will re-cement with approximately 75 sacks. Perforate Upper Gallup with 4 shots per foot.. Sand-oil fracs with 1000 barrels oil and 40,000 lbs. sand. Re-install tubing, rods and pump.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
