Return well to production

(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

In January 1980, prior to acquisition by Solar Petroleum, Inc., this well was approved to convert to a water injection well; there is no documentation in files to indicate when or if it was done.

In October 1980, Solar entered the well, which was standing idle, & attempted to pull stuck tubing. The attempt was unsuccessful.

8/25/81 - Pulled stuck Lyon's packer free. Milled bad pipe at 309'. After milling still could not get packer through. Came out of hole. Ran 29 joints 2 3/8" tubing with 15' sub, 10' - 1 3/4" working barrel at 914', 36 - 3/4" rods & 8' sub. TD 920'.

Perfs: 899-911'.

Return well to production.
