13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Per our Sundry Notice dated September 18, 1990, it was planned to return this well to production. Flow testing this well during the period 9/21/90 to 9/24/90 indicates uneconomic high water cut production. It is therefore planned to convert this well to a water injection status.

Application to convert this well to an active water injection well is being made with the OCD-NM.
