

NEW MEXICO OIL CONSERVATION COMMISSION
PACKER SETTING REPORT

E-21-31N-1216

I, Joe Salmon, being of lawful age and having full
Name of party making report
knowledge of the facts hereinbelow set out do state:

That I am employed by Aztec Oil and Gas in the capacity of
District Superintendent, that on May 2, 1966

I personally supervised the setting of a Baker Model D Production Packer
Make & type of packer
in Aztec Oil and Gas's, Thompson,
Operator of well *Lease name*

Well no. 10 located in the Basin Dakota-Blanco Mesaverde field,
San Juan county, state of New Mexico, at a subsurface depth of
7055 feet, said depth measurement having been furnished me by
Lane Wells;

That the purpose of setting this packer was to effect a seal in the annular space between two strings of pipe where the packer was set so as to prevent the commingling, in the bore of this well, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer; that this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as that it prevented any movement of fluids across the packer.

ORIGINAL SIGNED BY JOE C. SALMON
