(Other) Drill Monitor Well ☒

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Union Texas Petroleum requests permission to drill a monitor well at 1714' FSL & 2002' FWL, Section 21-T32N-R10W. A 6-1/4" hole will be drilled to 500' with air and/or water if necessary. 4" Schedule 40 slotted PVC casing will be set to total depth. The casing will not be cemented. No pumps will be set in this well. There will be no new disturbance as the well will be located on the existing Payne 8 wellpad. Archaeologic clearance was recommended in Report No. 84-SJC-006. The Payne 8 was previously named the Payne 2E. Once the well is no longer needed, a request for plugging instructions will be made.

18. I hereby certify that the foregoing is true and correct
