3. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

Request permission to combine production for off-lease measurement and sales based on economic necessity. Since pipeline companies will not lay line to wells. BASF laid line to El Paso. All gas passes through 3 meters: BASF allocation meter at each well, BASF check meter, and El Paso sales meter (SE4 35-31n-14w). Check meter is immediately upstream from sales meter. Sales amount recorded by El Paso is allocated to each well based on proportion produced by each well as recorded by allocation meters. Check meter verifies sales meter. All working and royalty interests notified. Same royalty rates for all leases. All leases Indian. See attached map for well locations, lease lines, pipeline routes, and El Paso sales meter. Meters comply with Onshore Order #5.

Gas sold through El Paso system as a secondary option. Primary option is to sell through Western Gas Processors (Sundry Notices dated 4-14-91).
