Attention: R.E. Fraley

RE: Injection Pressure Increase  
Cedar Hill SWD No. 1  
San Juan County, New Mexico

Dear Mr. Fraley:

Reference is made to your request dated September 13, 1989, to increase the surface injection pressure on the Cedar Hill SWD Well No. 1. This request is based on a step rate test conducted on the well on August 31, 1989. The results of the test have been reviewed by my staff and we feel an increase in injection pressure on the well is justified at this time.

You are therefore authorized to increase the surface injection pressure on the following well.

WELL AND LOCATION

MAXIMUM INJECTION  
SURFACE PRESSURE

Cedar Hill SWD No. 1  
Unit B, Section 29, T-32 North,  
R-10 West, NMPM, San Juan County,  
New Mexico.

1984 PSIG

The Division Director may rescind this injection pressure increase if it becomes apparent that the injected water is not being confined to the injection zone or is endangering any fresh water aquifers.

Sincerely,

  
William J. LeMay  
Director
