13. Describe Proposed or Completed Operations

It is intended to workover the well in the following manner:

NU BOP. Pull the 2-3/8" tubing. Underream the well to 9-1/2". Cavitare the Fruitland Coal formation utilizing natural and air assisted surges until the well stabilizes. Clean the well to TD and run a 5-1/2", 15.5#, K-55 casing liner. The liner will be pre-perforated 4 spf across the coal intervals with no cement. Production tubing will be 2-3/8", 4.7#, J-55. The well will then be returned to production.

14. I hereby certify that the foregoing is true and correct.

Signed Reggie Brannard (GWL47) Title Regulatory Administrator Date 1/15/97
