As discussed today with Jim Lovato (Durango-BLM), will change proposed TD from 4,800' (shown on APD) to 5,300'. Strata are thicker than expected due to steep dip on hogback. Now drilling through Mancos shale at 3,825'.

No change in target formation (Dakota). Only change in casing and cement will be to increase depth and volumes proportionately.

Please send copy of operator
Change from: Wintershall
