17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This well was staked at 1170' FNL & 1850' FFL of section 25-32N-9W. The east half of this section is narrow making the original location unorthodox. For some reason we didn't catch this while staking and inspecting the location. Ernie Bush with OCP caught it while reviewing the APD for the well. We have moved the stake to 1170' FNL & 1820' FFL and resurveyed the location. The survey plot and new cut & fill are attached to this notice.
