SUNDRY NOTICES AND REPORTS ON WELLS

Do not use this form for proposals to drill or to deepen or reentry to a different reservoir.
Use "APPLICATION FOR PERMIT—" for such proposals

SUBMIT IN TRIPLICATE

070 FARMINGTON, NM

FORM APPLIED FOR
Budget Bureau No. NM-0135
Expires: March 1993

5. Lease Designation and Initial No.
NM-013642

6. If Indian, Allottee or Name
NA

7. If Unit or CA, Agreement Designation
NA

8. Well Name and No.
GARDNER C

9. API Well No.
5

10. Field and Pool, or Exploration Area
Basin Fruitland Coal

11. County or Parish, State
San Juan, NM

1. Type of Well
☐ Oil Well ☒ Gas Well ☐ Other

2. Name of Operator
Koch Exploration Company

3. Address and Telephone No.
P.O. Box 489 Aztec, NM (505-334-9111)

4. Location of Well (Footage, Sec., T., R., M., or Survey Description)
1 Sec. 26 - T32N - R9W (L)
1680' FSL & 1010 FWL

12. CHECK APPROPRIATE BOX(S) TO INDICATE NATURE OF NOTICE, REPORT, OR OTHER DATA

TYPE OF SUBMISSION	TYPE OF ACTION
<input checked="" type="checkbox"/> Notice of Intent	<input type="checkbox"/> Abandonment

Clean Out Well Bore

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is not initially drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Production on this is not what we think the potential for this well could be. In 1995, when we worked over this well it had been shut in for 9 months, thus the water volumes were so great that we did not clean out well effectively. We believe that the high volumes of water during workover caused the formation to swell. Now that the water volumes have decrease substantially, we feel that a workover at this time will enhance our production greatly.

7" 23# casing is set @ 3073' KB with a window cut @ 2853' - 2861' KB and PBSD @ 3458' KB. We plan on cleaning out well with air to TD and installing liner to TD. Liner will be a 5 1/2", 17#, K-55, LT&C pre-perforated, tapped, and plugged. To clean out with air we will need to construct a water reserve pit 50' x 50' x 10' deep and a blow pit (unlined so as to flare gas) which will drain into the water reserve pit. We will install a minimum of 8 mil plastic liner in reserve pit only if BLM suggests that it would be appropriate. Only produced water with soap and coal fines will be discharged into pit. Reserve pit will be totally fenced to contain all produced fluids until closure of pits.

After clean out is complete and all fluids removed, we will cover all coal fines in pits with top soils and reclaim area to original contours and then reseed to BLM specs. All proposed construction will be on existing disturbed well pad. Proposed work is planned to begin in late May to early June 1997 and after Sundry Notice approval.

14. I hereby certify that the foregoing is true and correct
