13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

The replacement well (32-7 #211R) was drilled in 1998 and since that time this well has been used as a pressure observation well. Plans now are to run a casing integrity test by first RIH w/tubing and tagging up on fill and attempting to cleanout using a hydraulic bailer. Cleaning out to PBD. Then RIH w/tailpipe and packer on 2-3/8" tubing and set packer in 7" casing @ +/- 3,246'. Load backside with inhibited water and test casing to 500 psi for 30 minutes. Turn well back to production department to continue to use as a pressure observation well.
