13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Because of moisture received during the weeks of July 21 & 28th, rainwater and rain runoff has accumulated on this facility again and needs to be drained off.

The Operator plans on draining this water on Friday August 1st @ 8:00 am. Any subsequent drainage will continue to be proceeded by a 24 hour pre-notification (BLM sundry notice).

This water is not produced water and contains zero additives with no visible sheen to it's surface. The volume to be drained this time is estimated to be >694 bbls. The area covered with water is approximately 130' x 60' and at it's deepest point approx. 6-8" deep.
