12. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

On May 28, 1996 Hallwood re-perforated the Fruitland Coal formation (1963-1990') with 4 spf, 23 gram charge, 90° phasing, .57" hole. On May 29, 1996 the well was re-fractured with 75,000# of 16/30 brown sand. Production on 7/7/96 was 56 MCF, 22 BW.

Refrac appears initially to have been unsuccessful as post workover production rate is essentially the same as pre-workover rate.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
