13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

This is a State well, but has A Federal ROW already approved. Note the ROW number at the top of this sundry.

Phillips is requesting permission to run a temporary supply gas line to a point at WFS gas gathering system to the San Juan 32-7 #13A for use during the drilling and completion phases. The line will be laid parallel to the access road, outside of the barrow ditch. The line will not be used for production purposes and will be removed after completion.

Please note the attached maps indicating the point of connect at WFS gathering system to the well location. The temporary surface pipe will be 2-3/8" tubing and will be hydrotested to 1-1/2 times the expected line pressure.
