13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

While drilling the 8-3/4" hole for the intermediate casing we encountered a problem drilling. We were losing circulation in the coal section of this well. We were only able to drill with mud to 3762' and this is where we are planning on setting the intermediate casing. Once set & cemented, we will continue to drill the 6-1/4" hole with air to TD.

Verbal approval was given by Errol Becher @ 9:00 am 8/6/98 to set and cement the intermediate casing @ 3762'. Future sundries and the completion report will detail procedures used to complete this well.
