## INSTRUCTIONS

This form shall be executed and filed in QUADRUPLICATE with the District Office of the Oil Conservation Commission, covering each unit from which oil or gas is produced. A separate certificate shall be filed for each transporter authorized to transport oil or gas from a unit. After said certificate has been approved by the Oil Conservation Commission, one copy shall be forwarded to the transporter, one copy returned to the producer, and two copies retained by the Oil Conservation Commission.

A new certificate shall be filed to cover each change in operating ownership and each change in the transporter, except that in the case of a temporary change in the transporter involving less than the allowable production for one proration period, the operator shall in lieu of filing a new certificate notify the Oil Conservation Commission District Office, and the transporter authorized by certificate on file with the Commission, by letter of the estimated amount of oil or gas to be moved by the transporter temporarily moving oil or gas from the unit and the name of such temporary transporter and a copy of such notice shall also be furnished such temporary transporter. Such temporary transporter shall not move any more oil or gas than the estimated amount shown in said notice.

This certificate when properly executed and approved by the Oil Conservation Commission shall constitute a permit for pipe line connection and authorization to transport oil and gas from the property named therein and shall remain in full force and effect until

- (a) Operating ownership changes
- (a) The transporter is changed or
- (c) The permit is cancelled by the Commission.

If any of the rules and regulations of the Oil Conservation Commission have not been complied with at the same time this report is filed, explain fully under the heading "REMARKS."

In all cases where this certificate is filed to cover a change in operating ownership or a change in the transporter designated to move oil or gas, show under "REMARKS" the previous owner or operator and the transporter previously authorized to transport oil or gas.

A separate report shall be filed to cover each producing unit as designated by the Oil Conservation Commission.

November 10, 1959

Mr. Elvis Uta, Gas Engineer  
New Mexico Oil Conservation Commission  
Santa Fe, New Mexico

Dear Elvis:

As we briefly mentioned to you in Santa Fe awhile back, our Measurement Section has discovered that the production out of the Astee Oil and Gas Company's, Grenier No. 3 Well has been understated by 95,037 MCF during the period from September 1955 through July 1959, due to the fact that the deliveries were calculated for a 5/8" orifice plate (which we thought was in service) whereas the volumes should have been calculated for the plates re bored orifice size of 3/4" (which was actually applicable).

During the same period and for the same reason the annual deliverabilities were similarly understated, which in turn also caused the allowables allocated by the Commission to be understated by some 80,397 MCF.

The 95,037 MCF of additional production due the well, has been adjusted and reported on form G-115 and G-111 and the entire amount has subsequently appeared on the Monthly Proration Schedule as cumulative overproduction. Thus, since the overage resulted because of the restrictions placed on the well in our efforts to produce it within the allowables then assigned, we respectfully request the Commission to grant the 80,397 MCF of back allowables that should have accrued. It is felt that the circumstances prompting the recalculation and adjustment in the production, warrants similar recomputation and adjustment of the allowables attributable to the well.

For your convenient consideration in this respect, we have prepared and attach herewith two schedules showing the production, allowables, deliverabilities and status of the well, as originally calculated (Schedule I) and as should have been calculated (Schedule II) for each of the months of the period involved.

We trust you will find these calculations in acceptable order and we will be most grateful for your assistance in expediting the matter.

With kindest regards, we are,

Yours very truly,

J. R. Rynum, Administrator  
Gas Contracts and Prorations
