17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

This injection well was shut in October 1972 for further evaluation of production in the "D" area of the Unit resulting from this injection. U.S.G.S. approval of this shut in was 6-25-70, however, shut in of the well was deferred since small portions of the "D" area were being evaluated to note results that might be applicable to all of the "D" area.

The well is in a large Unit which is now under waterflood operations. Future plans are to conduct waterflood and tertiary recovery studies. These studies may result in a revised waterflood plan or in a tertiary recovery program that may require the use of this well in order to recover the maximum amount of oil from this reservoir.
