*Re: Consolidated #1-26 Ripley
N-26-32N-13W*

Gentlemen:

On February 18, 1963 Consolidated Oil & Gas Company wrote a letter to the Commission stating that the Dakota zone of the above well had been temporarily abandoned and stating further that the Dakota side of this dual would be permanently plugged & abandoned as soon as the weather permitted.

As of this date we have received no further information indicating that this work was ever done.

Will you please advise.

Yours very truly
