South Ute Mountain
Well No. 1 is located 550 ft. from N line and 1890 ft. from W line of sec. 26
Section 26 32N 23W 189N
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Wildcat San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the surface above sea level is 4920 ft.
ground

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well with rotary tools to an approximate depth of 8000' to the Pre-Cambrian. At least 200' of 13 3/8" OD casing will be set and cemented to surface. An intermediate string of 9 5/8" casing will be set at approximately 3000' if prudent drilling practice so dictates. If commercial production is found a 7" OD oil string will be set and cemented. We propose to drill on this unorthodox location since the center of the acre tract is in a large draw.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Continental Oil Company
