RE: Application for Testing Allowable
Ute #7
Barker Creek Paradox Field

Gentlemen:

Subject well has been completed as a re-entered Paradox well from perforations 8374-8404. We have laid a temporary line to sell gas before our lease expiration date of November 26. We are currently attempting to obtain waivers from offset operators for a non-standard proration unit consisting of the west halves of Sections 18 and 19, Township 32 North, Range 14 West, San Juan County, New Mexico.

Due to the fact that the well is very slow to clean up after an acid job, we request to be granted a testing allowable of 20,000 MCF.

Yours very truly,

MERRION & BAYLESS
