DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Southern Union Gas Company plans to take over operations of Monsanto Chemical Company's #1 John and #2 Bill with Cable Tools from its present TD of about 2812' to test the Dakota expected at about 3500'. If the Dakota is dry, plans call for the setting of 5" liner through the casing and a sand oil free.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
