RECEIVED  
AUG 29 1960  
U. S. GEOLOGICAL SURVEY  
FARMINGTON, NEW MEXICOAugust 22, 1960Well No. 21 is located 660 ft. from S line and 660 ft. from E line of sec. 2121/4 Section 21 T12N, R10W, M20N  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
Undesignated San Juan County New Mexico  
(Field) (County or Subdivision) (State or Territory)The elevation of the derrick floor above sea level is \_\_\_\_\_ ft. (9130' Ground Elevation)

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

We propose to drill this well with rotary tools to an estimated depth of 8500' to test the Upper and Lower Permian, Mississippian, and Devonian formations. Approximately 30' of 20" surface pipe will be set and cemented with a cable tool rig. Approximately 200' of 13 1/8" surface casing will be set and cemented to surface and, if necessary, a 9 5/8" intermediate string will be set at approximately 4500' and cemented. If commercial production is encountered, a production string will be set and cemented and the well completed.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations are commenced.
