DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Postage location carried on Intention to Drill, approved January 12, 1962 (400' FWL and 1450' FWL), was found to be in rough topography that would cause unusual amount of bulldozing and location work. Moved to North and 10 feet East to remedy, as reported above.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
