DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

After running and cementing 75' of 7" surface casing with 10 sacks of cement, the cement was drilled out and no surface water was apparent. (Cement was circulated to surface around casing.) Drilling was resumed after cement hardened, using air as a circulating medium.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
