

NEW MEXICO OIL CONSERVATION COMMISSION  
PACKER SETTING REPORT

I, Joe C. Salmon, being of lawful age and having full  
*Name of party making report*  
knowledge of the facts hereinbelow set out do state:

That I am employed by Aztec Oil and Gas in the capacity of  
District Superintendent, that on May 8, 1966

I personally supervised the setting of a Baker Model D Packer  
*Make & type of packer*

in Aztec Oil & Gas's, Culpepper Martin,  
*Operator of well* *Lease name*

Well no. #3 located in the Blanco Mesaverde & Basin Dakota field,

San Juan county, state of New Mexico, at a subsurface depth of

6270 KB feet, said depth measurement having been furnished me by

McCullough Tool Company;

That the purpose of setting this packer was to effect a seal in the annular space between two strings of pipe where the packer was set so as to prevent the commingling, in the bore of this well, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer; that this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as that it prevented any movement of fluids across the packer.
