

DEVELOPMENT PLAN FOR SURFACE USE
MOUNTAIN UTE GAS COM "I" NO. 1

Amoco Production Company proposes to drill the subject well with rotary tools on a graded location as shown on the attachments. The location is in accordance with NMOCC regulations. Approximately .8 mile road will have to be constructed from an existing road to the location.

No airstrips or field camps are located near the location and none will be built. Vegetation in the immediate area of the location is sparse. Water for drilling operations will be obtained from an irrigation ditch next to State Highway No. 17 and hauled to the location. Upon completion of the well, the location will be cleaned and the reserve pit will be backfilled.
