17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This well is shut in for the following reasons:

... well is a low pressure gas well capable of producing into a low pressure gathering system, however, no low pressure system exists.

... well is presently tied into gas sales line, however, pressures are too high to allow it to produce.

... well is located 90' from Storey #1A and 180' from Storey #2 which are currently on production and gauged 4x a week. Storey #3 is monitored at that time, thereby allowing any leaks to be detected on a timely basis.

It is proposed that this well be shut in until El Paso's sales line pressure is lowered allowing the well to be placed on production. Sundry Notices will be filed annually until such time.

This Approval ~~is Temporary~~ Expires 6/14/84
