1. Outline the acreage dedicated to the subject well by colored pencil or hatchure marks on the plat below.
2. If more than one lease is dedicated to the well, outline each and identify the ownership thereof (both as to working interest and royalty).
3. If more than one lease of different ownership is dedicated to the well, have the interests of all owners been consolidated by communitization, unitization, pooling, etc?

☐ Yes ☐ No If answer is "yes," type of consolidation: _____

If answer is "no" list the owners and tract descriptions which have actually been consolidated. (Use reverse side of this form if necessary.)

No allowable will be assigned to the well until all interests have been consolidated (by communitization, unitization, forced-pooling, or otherwise) or until a non-standard unit, eliminating such interests, has been approved by the Commission.

I hereby certify that the information contained herein is true and correct to the best of my knowledge and belief.

C. M. Parham

Senior Production Engineer

Consolidated Oil & Gas, Inc.

June 21, 1978

I hereby certify that the location shown on this plan was plotted from field notes of actual surveys made by me or under my supervision, and that the same is true and correct to the best of my knowledge and belief.

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The data are the mean $\pm$ SD of three independent experiments. The asterisk indicates a significant difference ($P < 0.05$) between the control and the experimental groups.

[illegible]

James P. Duggan

Figure 1. Schematic representation of the experimental design. The subjects were divided into two groups: a control group (n = 10) and an experimental group (n = 10). The control group received a placebo (PLA) and the experimental group received a 10% w/v alginate-chitosan hydrogel (AC10). The subjects were then subjected to a 10% w/v alginate-chitosan hydrogel (AC10) treatment. The subjects were then subjected to a 10% w/v alginate-chitosan hydrogel (AC10) treatment. The subjects were then subjected to a 10% w/v alginate-chitosan hydrogel (AC10) treatment.
