7.   cont'd.   will be provided for human waste. If large
                                      amounts of liquids are left in the reserve pit
                                      after completion of the project, the pit will
                                      be fenced until the liquids have had adequate
                                      time to dry. The location clean-up will not
                                      take place until such time as the reserve pit
                                      can be properly covered over to prevent run-off
                                      from carrying any of these materials into the
                                      watershed. No earthen pit will be located on
                                      natural drainages; all earthen pits will be so
                                      constructed as to prevent leakage from occurring.

8.   Ancillary Facilities - No camps or airstrips will be associated
                             with this project.

9.   Wellsite Layout -   Please refer to the attached Plat No. 1.

10.   Plans for Restoration of the Surface - After completion of the
                                      proposed project, the location will be cleaned
                                      and leveled. The location will be left in such
                                      a condition that will enable reseeding operations
                                      to be carried out. Seed mixture as designated by
                                      the responsible government agency will be used.
                                      The reseeding operation will be performed during
                                      the time period set forth by the regulatory
                                      body. The location production equipment will
                                      be painted as designated by the responsible
                                      government agency.

11.   Other Information - Deer graze and coyote run on the proposed
                          project site. The terrain is rolling hills and
                          sandstone ledges with pinon and cedar growing.

12.   Operator's Representative - W.D. Dawson, PO Box 990, Farmington, NM

13.   Certification -   I hereby certify that I, or persons under my
                           direct supervision, have inspected the proposed
                           drillsite and access route; that I am familiar
                           with the conditions which presently exist; that
                           the statements made in this plan are, to the best
                           of my knowledge, true and correct; and that the
                           work associated with the operations proposed
                           herein will be performed by El Paso Natural Gas
                           Company and its contractors and/subcontractors
                           in conformity with this plan and the terms and
                           conditions under which it is approved.

                           Don Walker
                           _____
                           D. C. Walker
                           Project Drilling Engineer
