

MULTIPOINT DEVELOPMENT PLAN FOR SURFACE USE

ENSERCH EXPLORATION, INC.

Federal 1-31

SAN JUAN COUNTY, NEW MEXICO

1. Existing roads are shown on the attached map labeled Exhibit No. 4.
  - A. The staking plat form C-102 is attached to form 9-331C.
  - B. The nearest town is LaPlata which is approximately 3-1/4 miles South East of location. The attached map (Exhibit No. 4) shows access from Farmington, North on New Mexico Highway 170 for 15.2 miles, turn left (west) on County Road B-23 approximately 1 mile to County Road B-24 (Barker Dome Road). Follow Barker Dome Road 2.2 miles to intersection at water well, turn right on existing road for 2/10 mile to intersection of lease access road. Turn left on access road approximately 4/10 mile to location.
  - C. Access routes on existing roads are shown on Exhibit No. 4 and are color coded red.
  - D. Not Applicable
  - E. All roads within requested radius are shown on Exhibit No. 4.  
All roads are natural gravel roads.
  - F. No improvements are proposed on existing roads. They are in good condition and are maintained by the county.
2. Planned Access Road.  
As shown on attached map Exhibit No. 4, color coded green, we propose to construct approximately 2100' of access road from location by grading along natural contour of hill.
  - A. Maximum width will be 16 feet.
  - B. Maximum grade will be maintained at less than 7%
  - C. No turnouts are proposed.
  - D. Drainage will be natural along contour.
  - E. No culverts are proposed to be installed and there are no major cuts or fills anticipated.
  - F. Surfacing material will be native soil with no materials hauled.
  - G. There will be no gates, cattle guards, or fence cuts.
  - H. Road has been center line flagged with red and blue flagging material.
