RE: State Com AJ 34E, N-36-32N-12W, API 30-045-23745

Dear Yolanda:

The 2002 Packer Leakage Test on the referenced well indicates there is communication between the producible zones.

Review Rule 112-A.2.b

...."Test results shall be filed with the Division within 20 days of test completion. In the event a segregation and/or packer leakage test indicates communication between separate pools, the operator shall immediately notify the Division and commence corrective action on the well."

In order to comply with Rule #112A, you are hereby directed to initiate remedial activity and retest the well to show separation of the zones prior to February 20, 2003.
