San Juan County, New Mexico

ST
Gentlemen:

The above referenced well is a Mesaverde/Dakota commingle. Attached is a copy of the allocation for the commingling of the subject well completed on January 21, 2002. DHC-472az was issued for this well.

Gas:	Mesa Verde	85%
	Dakota	15%
Oil:	Mesa Verde	100%
	Dakota	0%

These percentages are based upon reserves assigned to each formation founded on production from the respective formations before and after workover operations. Since this well produced no condensate prior to the addition of the Mesaverde formation, condensate is being allocated solely to the Mesaverde formation. Please let me know if you have any questions.

Sincerely,

A handwritten signature in cursive script, appearing to read "Peggy Cole".

Peggy Cole

Production Allocation Documentation

Vasaly #2E

Production Allocation

Based on Remaining Reserves

Mesaverde Recalculate January 2002

GAS

	<u>RR</u>	<u>Allocation %</u>
Dakota	87.9	15%
All	<u>568.2</u>	
Mesaverde	480.3	85%

Condensate

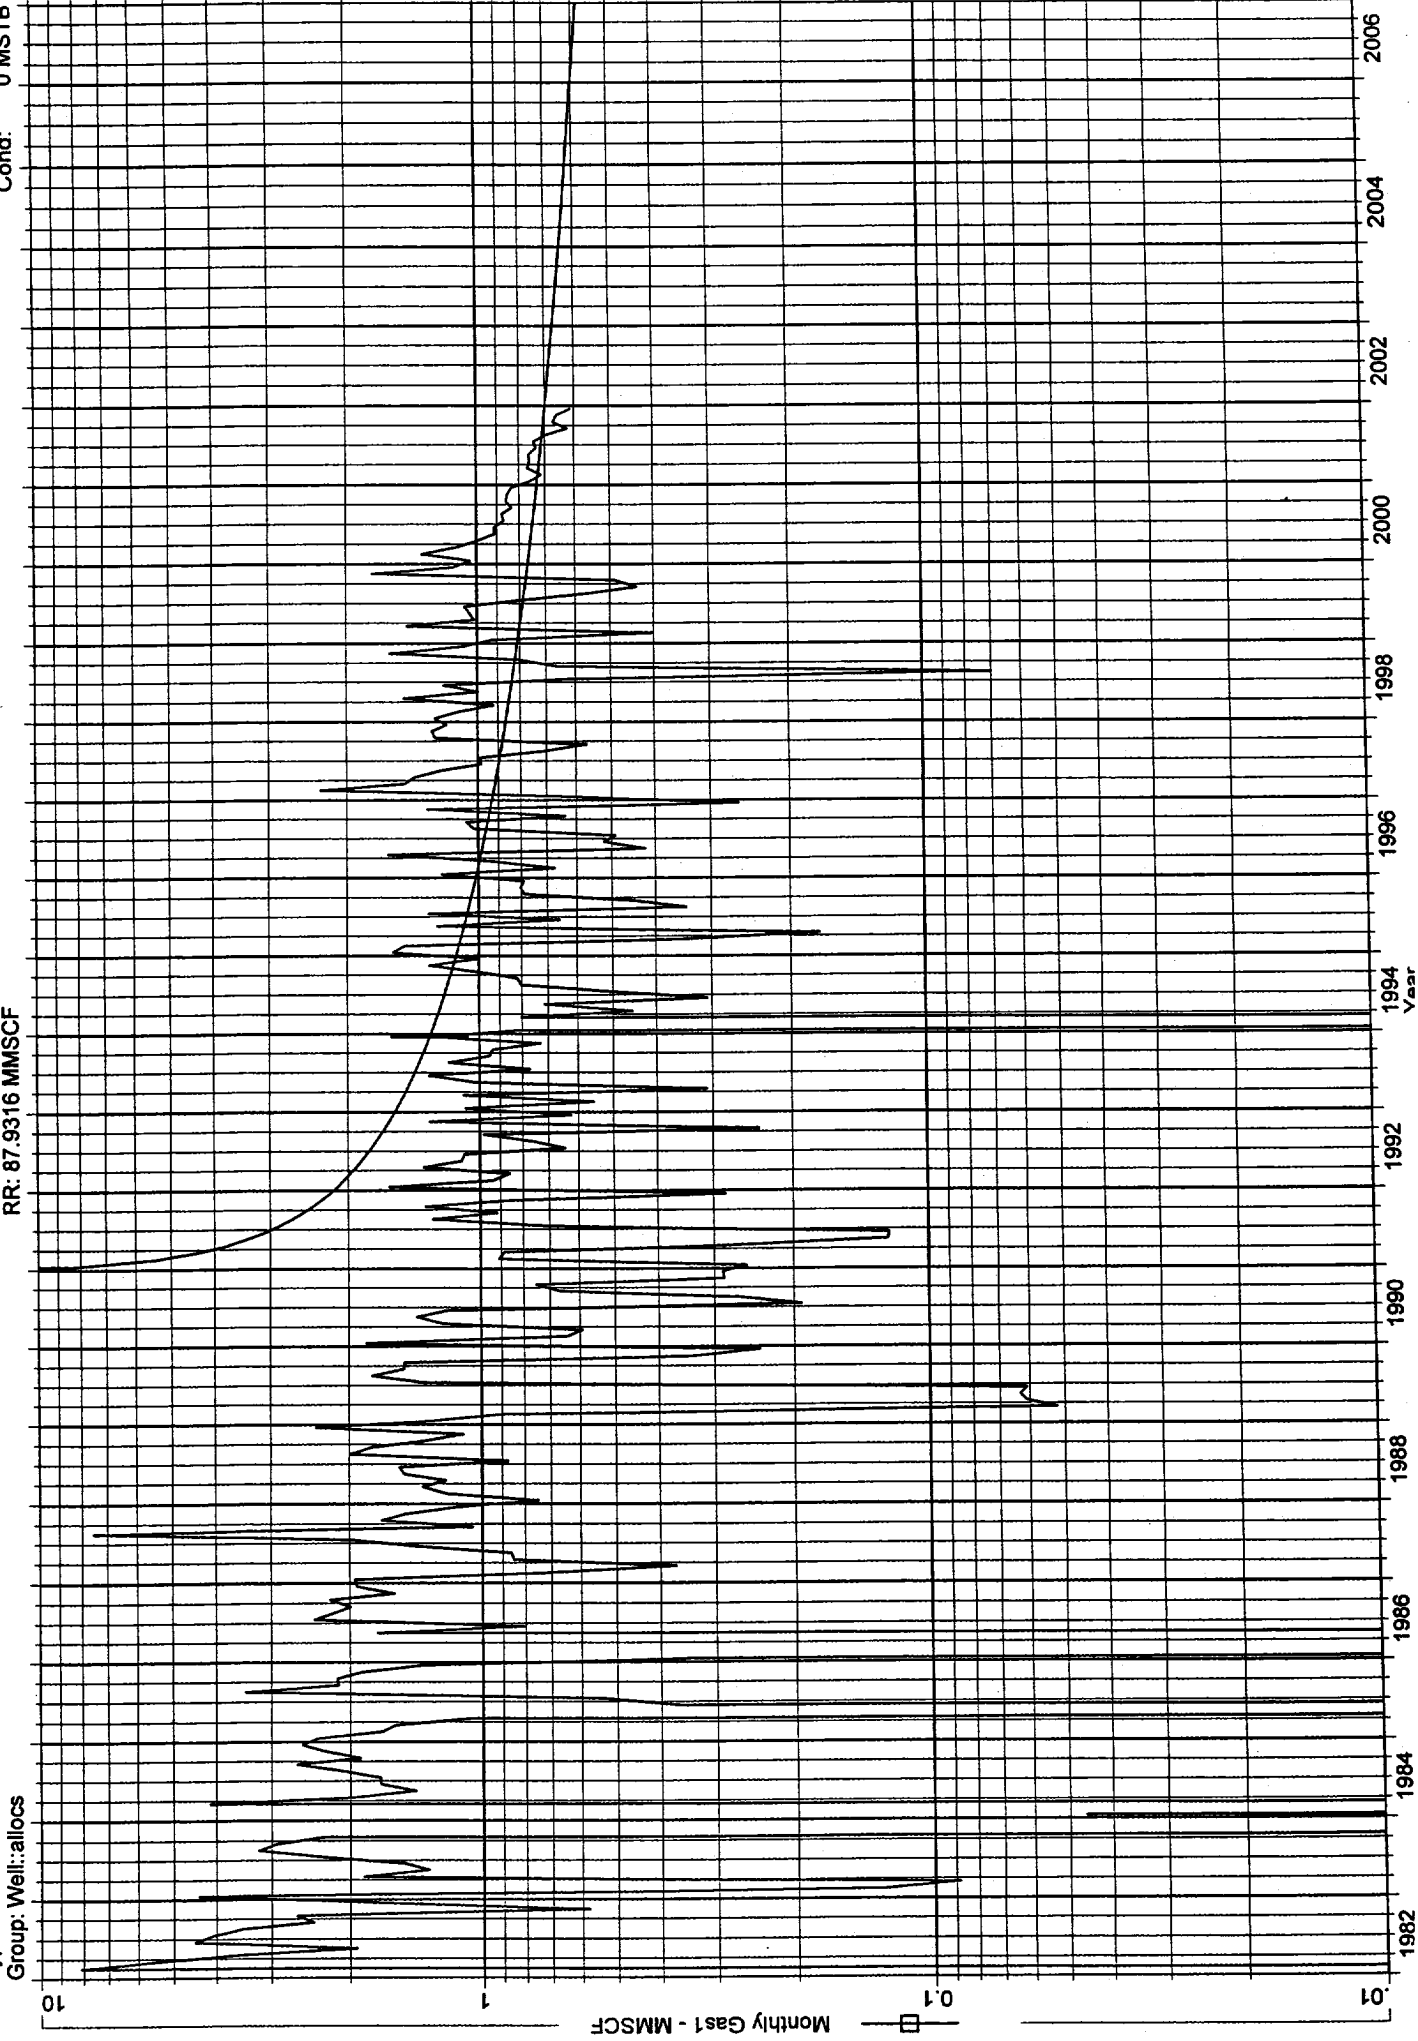

Since this well did not produce condensate until the Mesaverde formation was added, the condensate is being allocated solely to the Mesaverde.
