Mr. Errol Beecher
District Oil & Gas Supervisor
Minerals Management Service
Box 600
Farmington, NM 87401

Re: Navajo 17 C-28-32N-17W Navajo 27 H-20-32N-17W

Dear Mr. Beecher:

As per your request, this letter states the Oil Conservation Division's objection to the above referenced wells, using 35 sacks of cement to cement the production casing. This area is an authorized active water flood area. We recommend that cement be circulated to surface.

If you have any further questions please contact this office.

Yours truly,

A handwritten signature in cursive script that reads "Jeff A. Edmister".

Jeff A. Edmister
Deputy Oil & Gas Inspector

JAE:dh

cc: Mr. Joe Ramey - Santa Fe
