17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This lease is owned jointly 50% by Dugan Production Corp. and 50% by Sun Exploration.

Dugan Production Corp. had obtained a farmout from Sun on their 50% of the lease and commenced drilling the Hogan #1 well in October, 1978. Drilling was shut down by the Indian Grazing Rights holders on October 30, 1978. Dugan then entered into an agreement with Sun to extend the terms of the farmout until the surface problems were solved. It took such a long time to solve these problems that Sun cancelled the farmout. This was unknown to Dugan Production at the time and we settled with the Grazing Rights Owners in 1985. Also unknown to Dugan Production, Sun had farmed out their interest in this property to James Woosley from Cortez. Woosley recently filed for Chapter 11 Bankruptcy.

Currently, we are unable to complete the well until we solve these lease problems. We are now dealing with Sun to make a decision on how their 50% of this property will be handled.

We, therefore, request an indefinite extension of time until we can come to a conclusion with the problems on this well.

18. I hereby certify that the foregoing is true and correct
