17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

BayStar Petroleum Corporation requests permission to change source of water proposed on APD received on September 5, 1985, to be used in drilling the P-18. APD had water being transported from town to the location. BayStar would like to change the water source to Well #P-14 located on the Navajo P lease. The well is located in Section 35, Township 32North, Range 17 West, 650'fml and 640'fwl. The P-14 was completed from 2606' to 2856' in the Jurassic Morrison as a water supply well in the Many Rocks-Gallup pressure maintenance program in April of 1965. The well is still used as a water supply well. Enclosed is water analysis of the produced well. The water will be treated properly to be used in the drilling operations.
