## 13. Describe Proposed or Completed Operations

It is intended to not run the packer as outlined in the original completion procedure, but will produce up the tubing to leave a larger casing annulus to unload well due to tight production. The last gas sample shows no H<sub>2</sub>S. The well has L-80 casing, so there should be no H<sub>2</sub>S problem.

(Verbal approval from Dan Rabinowitz, BLM on 1-14-98).
