	<input type="checkbox"/> Change Plans	<input type="checkbox"/> Plug and Abandon	<input type="checkbox"/> Temporarily Abandon	
	<input type="checkbox"/> Convert to Injection	<input type="checkbox"/> Plug Back	<input type="checkbox"/> Water Disposal	

13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recomple in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Due to complications encountered during the sidetrack drilling operations on the above mentioned well, Conoco Inc. proposes for second sidetrack as per the attached procedures.

14. I hereby certify that the foregoing is true and correct. Electronic Submission #11004 verified by the BLM Well Information System For CONOCO INC., sent to the Farmington

CONOCO

Newberry LS 2C – Sidetrack #2

Background

Whipstock face was oriented 180 degrees in the opposite direction of the old hole. A window was cut in the casing F/3400' T/3415'. The sidetrack was conducted with a convental rotary assembly (7 7/8" bit). While drilling at 3556' the old wellbore was encountered.

Wellbore Changes Proposed:

Set a balanced cement plug F/3556' T/3100'. Cement will be dressed off to 3415'. Directional tools will be used to kick off the cement plug and sidetrack the well (1 3/4 degree bent motor w/ MWD, Gyro will be used until far enough away from casing to get an MWD reading). Plan is to have ~40' of displacement from the old wellbore by 4200', then LD the directional tools.

Continue drilling to TD w/ mud.

Run 5 1/2", 15.5ppf, J-55, LTC casing back to surface as a long string. Two DV Tools will be run to insure a good cement job.

Cement

Cement Plug:

160 sxs (30 bbls) Class H w/ 3% KCL mixed at 16.7ppg, 1.04 cuft/sx.

5 1/2" CSG:

Will be cemented in three stages with 12.8 ppg slurry (25% excess over caliper volume) with TOC at 3000'.

3/20/02 – Verbal approval from BLM (Jim Lovato) @ 0745 hrs.

3/20/02 – Verbal approval from NMOCD (Charlie Perrin) @ 1030 hrs.

Brett Thompson
Drilling Engineer
