DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

Propose to drill test well to the Point Lookout. Sand Formation 5000 ft.

In drilling this well we expect to test the Warrington sand approx. depth 1700 ft., and the pictured cliff sand at approx. 2000 ft., and if either is commercial we may wish to complete well and start new well to Point Lookout.

Proposed casing, conductor-100 ft. of 1 1/2" cemented solid.
Will run such casing as is necessary to protect oil and gas.
The well will be drilled with a Tulsa Unit Rotary No. 30.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
