March 15, 1954

Mr. Dawson W. Henderson
Lariat Motel
Grants, New Mexico

Dear Mr. Henderson:

We still have never received a corrected Notice of Intention to Drill on the White, Busard & Gibbons #1 Santa Fe in the SW/4 Section 13-15N-10W. The Engineer's plat was submitted and has been approved. We also understand the bond is now in order; however it will be necessary for you to re-submit a Notice of Intention to Drill correcting the items pointed out in our previous letter to Mr. Yale McFate in Phoenix, Arizona. We note that Mr. McFate has written you on January 16, 1954 setting out our objections to the original Notice of Intention to Drill.

It is also necessary to file Form C-103 on your casing program and a Well Log, Form C-105, giving information as indicated. We would also like to know if you intend to plug this well or Temporarily Abandon.

May we hear from you regarding this matter?

Yours very truly,

Harry C. Arnold
Oil & Gas Inspector
District #3
