DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate muddling jobs, cementing points, and all other important proposed work)

Cement was spotted from 4000 back to 3825. Casing was shot off at 1595 and pulled. Hole was filled with heavy mud to within 30 ft. of top and bridging plug was placed in surface pipe and cement pumped in. A steel 4' marker is cemented in the top of the surface pipe and the lease is leveled and cleaned.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
